

R V and Boat Detailing Prices

RV's

While there are many different sizes of RV's, the current condition of the unit will determine the final cost to detail it. If the unit has sun fade or oxidation, we will need to use high speed buffers and compound to bring the gloss back. This service will add a minimum of \$5.00 per ft. to the cost of the detail. If it is in good shape then the following prices per foot to wash or wash and wax should be a guide.

FULL EXTERIOR WASH

\$5.00 per ft.

Includes

- *Bug removal
- *Washing all sides-front-back
- *Washing rims, tires, wheel wells
- *Dress and shine tires and rims
- *Clean exterior windows and mirrors

WASH AND WAX EXTERIOR

\$22.00 per ft.

Includes

- *Everything in a Full Exterior wash
- *Buff out minor scratches
- *UV protect all trims
- *Apply Wax/Sealcoat to awning covers
- *Apply Wax/Sealcoat sides/front/back

**NO INTERIOR CLEANING INCLUDED

BOATS AND PONTOONS

As with RV's the condition of the boat or pontoon will determine the final price. Units that have been left in the water or heavily sun faded will cost more to detail. An average boat or pontoon will require the following steps to get it clean and keep it shining for another year on the water. All boats left in the water will be priced separately.

- | | |
|------------------------|---|
| *Wash unit and trailer | Prep unit and trailer to detail |
| *Acid bath unit | Removes hard water spots |
| *Buff on compound coat | Removes minor scratches, restores shine |
| *Apply Wax/Sealcoat | Provides yearlong protection |
| *Interior cleaning | Clean carpets, seats, cushions, compartments, and towers. |

THE AVERAGE BOAT WILL COST \$25-\$30 PER FOOT TO DETAIL
